

SEDONA LABS[®]

SINCE 1987

Power Up Your Energy, Performance & Mood!

What is D-Ribose?

Many situations may deplete the concentration of cellular energy, leaving tissue energy starved. **D-Ribose** allows the body to boost its energy by building and restoring energy quickly at the cellular level.[†]

Sedona D-Ribose[®] is pure D-Ribose, a naturally occurring five-carbon sugar the body uses as the foundation for adenosine triphosphate (ATP)—the compound that carries energy throughout cells and powers all its functions.

Although ribose is a sugar, it is dramatically different from other sugars, such as glucose, fructose, and sucrose. The body utilizes ribose for the important work of synthesizing energy. Unlike other sugars, ribose does not increase blood glucose levels, stimulate spikes in insulin secretion, or increase cellular fat deposits.[†]

D-Ribose helps the body to produce energy and is the key to building energy more quickly.

While every cell in the body has the ability to make D-Ribose naturally, the metabolic pathway to make D-Ribose is slow and rate limited. In times of metabolic stress, the body is unable to produce D-Ribose. This limits ATP synthesis, restricts the formation of important cellular compounds, and delays tissue recovery.

D-Ribose works directly to restore and sustain healthy energy pools which are critical to cellular function. No other compound regulates the energy synthetic pathways necessary to perform this important, and vital, metabolic function.

SLSS-DRIBOSE

Optimize Core Energy[†]

How do D-Ribose and ATP work together to produce energy?

Sedona D-Ribose's active ingredient D-Ribose is the "energy currency" of the cell and ATP is the "power."

Many situations may deplete the concentration of cellular energy, leaving tissue energy starved. D-Ribose allows the body to boost its energy by building and restoring energy quickly at a cellular level.

Sedona D-Ribose[®] is pure, all-natural D-Ribose – the critical building block for energy.

Sedona D-Ribose is clinically researched to help replenish core energy and restore your quality of life. Your heart and other muscles require substantial amounts of energy, and **Sedona D-Ribose** helps keep them fully charged!

Sedona D-Ribose helps to:

- Restore and maintain depleted energy[†]
- Support healthy cardiac function[†]
- Temporarily relieve aches, pains and muscle soreness due to everyday activity[†]
- Promote Heart health – 36% improved cardiac function
- Fight Fatigue – 61% increase in energy
- Relieve sore, stiff muscles

**For extra support,
try Sedona D-RiboseM!**
