

SEDONA LABS®

SINCE 1987

# Improve Your Memory, & Sharpen Your Focus!

## What is Focus Memory & Mood?

**Focus Memory & Mood** helps keep your brain working fast thanks to the powerful extract of American Ginseng called Cereboost®. This miraculous ingredient is proven to enhance memory in just 60 minutes. And Focus is giving you the exact same dosage of Cereboost (200 mg) shown in research to improve memory in just one hour.

**Focus** contains natural ingredients that help increase blood flow to your brain. And this gives your brain the oxygen it craves. Without it, the entire thinking process slows down, cognitive impairments become evident, and short-term memory gets lost in a ball of confusion. But **Focus** is giving you *vinpocetine* from the periwinkle flower so your brain's blood flow and oxygen levels stay strong. By allowing your brain to breathe, your cognitive abilities spark up, your thinking becomes clearer, and you're giving yourself the ability to acquire new memories.

## Are you protecting your brain from stress?

The older we get, the more damage everyday stress and worries can have on our brains. That's why it's so difficult to think straight when you're under pressure or stress! **Focus** works to calm the brain, which rewards you with elevated moods and motivation. The herb Ashwagandha helps make this happen. And **Focus** gives you a patented extract of Ashwagandha called *Sensoril*® that's eight times more powerful than typical "whole" Ashwagandha.

SLSS-FOCUS

# Elevate Mood & Motivation<sup>†</sup>

**When your mind stays alert and sharp, life is terrific**

You laugh at jokes faster. You avoid embarrassing memory lapses. You never fall behind in conversation and you keep your freedom and independence to enjoy life longer.

Memory, mood and motivation can take a nasty decline as we age. But with **Focus Memory & Mood**, you continue to:

- Improve your memory
- Reduce your rate of natural cognitive decline
- Perk up your concentration
- Blow away “cob webs” and “brain fog”
- Sharpen your focus
- Elevate your moods and motivation

Maybe you can't run as fast, or jump as high, but you can keep your brain young with **Focus**.
